FIELD MANUAL

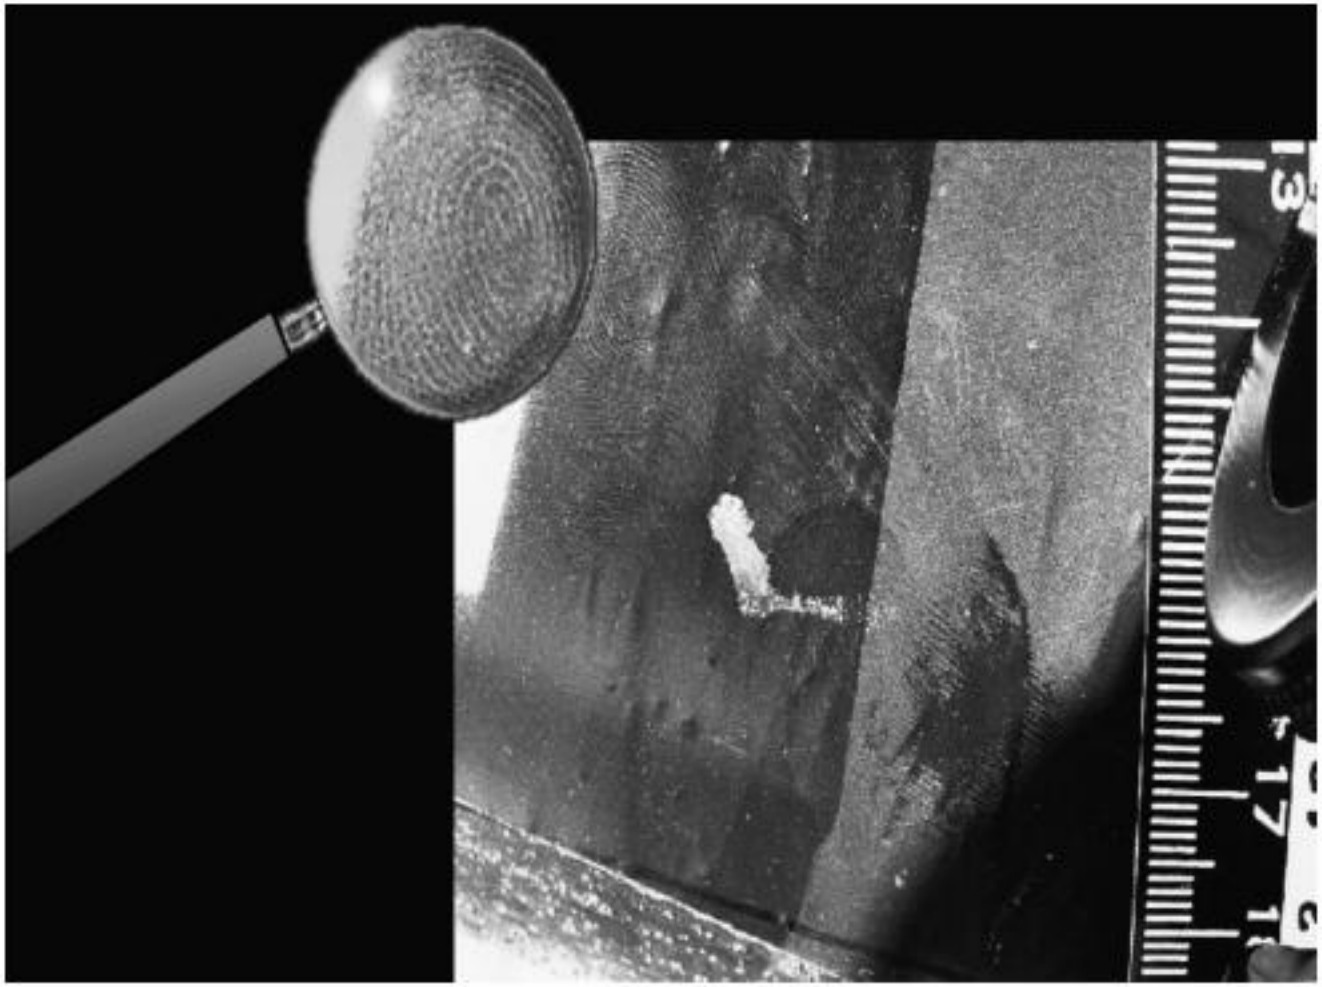
August 2001

Developed by the
Interagency Forum for Infrastructure Protection (IFIP)
Prepared by Sandia National Laboratories

Contains information which may be exempt from public release under the Freedom of Information Act (5 USC 552), exemption number(s) 1. Approval by the Department of Energy Departmental Element prior to public release is required.
Originator: R. V. Matalucci, Date: August 20, 2001
Further dissemination authorized to U.S. Government agencies and their contractors; other requests shall be approved by the originating facility or high DOE programmatic authority.

Proprietary - Official Use Only

Novel Fingerprint Recovery



Explosive Detection Portal

Screening Technology For Large Vehicles and Cargo

Blast Mitigation Program

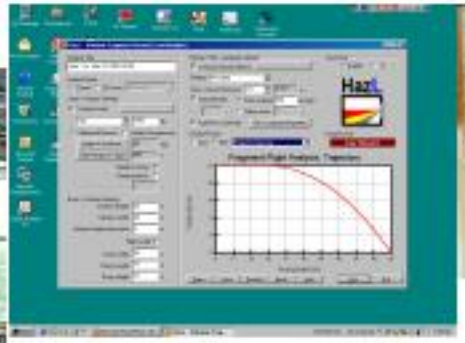
Objectives:

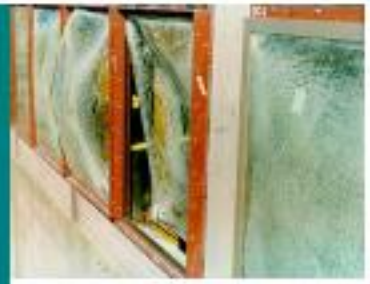
- Develop Cost-Effective Blast Mitigation Techniques
  - New Construction
  - Retrofits to Existing Structures
- Develop Vulnerability Assessment Tools
- Test and Evaluate Commercial-of-the-Shelf Products

Products:

- Vulnerability Assessment Tools:
  - Blast Effects
  - Structural Response
  - Human Injury
- Design Guidance
  - For Both New and Existing Structures
  - Prevent Progressive Structural Collapse
  - Reduce Debris Hazards

Prevention of Structural Collapse





Commercial Off-the-Shelf Product Testing

Debris Reduction
