# MARCH 2003 STATUS OF FORCES SURVEY OF ACTIVE-DUTY MEMBERS: TABULATIONS OF RESPONSES

## *Introduction to the Survey*

The *Human Resources Strategic Assessment Program* (HRSAP), located at Defense Manpower Data Center (DMDC), consists of both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness [USD(P&R)]. These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community—active, Reserve, civilian employees, and family members—on a wide range of personnel issues. The Web-based survey program, known as the *Status of Forces Surveys* (SOFS), provides timely data on active, Reserve, and civilian members. The SOFS Web surveys are short and limited to a few topics. There are nine SOFS Web surveys a year, with three cross-sectional samples of each population—active-duty members, Reserve component members, and DoD civilian employees. The paper-and-pencil surveys are used to obtain data on sensitive topics (e.g., sexual harassment) and from populations who have limited Internet access (e.g., spouses of active and Reserve members).

This report contains tabulations of responses from an active-duty SOFS Web survey conducted March 10 to April 21, 2003. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,<sup>1</sup> and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.<sup>2</sup>

## **Survey Content**

The topics covered in the *March 2003 Status of Forces Survey of Active-Duty Members* are those in the *Status of Forces Surveys of Active-Duty Members Long Term Content Plan*. The long-term content plan is at page 391. As indicated in that plan, there is a series of questions that are included on all active-duty SOFS. These include overall satisfaction, retention intention, perceived readiness, stress, tempo, and permanent change of station (PCS) moves. At the request of the USD(P&R), questions were included on stress and marital discord. Lastly, in response to policy offices, additional questions were included on the socioeconomic status of members when they entered the military, and housing priority and preferences. The survey was subdivided into questions covering the following 10 topic areas:

---

<sup>1</sup> Details on survey methodology are reported by Riemer and Kroeger (2002) and DMDC (2003a, 2003b).

<sup>2</sup> Refer to DMDC (2003a) to view a screen-shot version of the survey as it appeared on the Web.

1. *Satisfaction With Aspects of Military Service* – Aspects of military life and overall satisfaction.
2. *Career Intentions* – Current career status, initial career plans, and future career plans.
3. *TEMPO and Readiness* – PCS moves, days worked overtime, reasons for working overtime, time away from permanent duty station, the impact of time away on career intentions, individual and unit preparedness, and level of stress in work and personal life.
4. *Military Life* – Family time and time for personal interests, work and life expectations, and promotion opportunities.
5. *Relationships and Family Life* – Marital status and significant others, divorce, relationship discord and satisfaction, spouse/family support to stay on active duty, dependents, likelihood to recommend military service, and coping with deployment.
6. *Financial Condition* – Financial problems, financial condition, and total savings.
7. *Support Programs/Services* – Availability, usage, and satisfaction of on- and off-base programs and services; sources of information or assistance for Service members and families; stress measures including sources of stressors and stress reducers; and counseling service providers.
8. *Housing Issues* – Housing preferences and priority.
9. *Socioeconomic Background* – The socioeconomic status of Service members' parents (prior to entering the military) including parents' marital status, education, and employment status.
10. *Background Information* – Service, paygrade, education, spouse employment status, race/ethnicity, and location (both geographic and on/off base).

### ***Population and Reporting Categories***

The target population for all active-duty SOFS consists of active-duty members of the Army, Navy, Marine Corps, and Air Force, excluding National Guard and Reserve members who (1) have at least 6 months of service at the time the questionnaire is first fielded and are (2) below flag rank when the sample is drawn 6 months prior to the survey. Results are presented for the total population, and also by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified primarily by survey self-report. If the self-reported data are missing, then DMDC's Active Duty Master Edit File data at the time of sampling

(typically 6 months before survey administration) are used to impute the subgroup classification. Definitions for the reporting categories follow:

- *Officers* – The Officers subgroup includes warrant officers (W1 – W5) and commissioned officers (O1 – O6).
- *Race/ethnicity* – Self-report questions are consistent with requirements of the Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone reporting being Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *Geographic location* – Geographic locations are collapsed into geographic regions as defined by the *Department of Defense Worldwide Manpower Distribution by Geographic Area* (DoD Washington Headquarters Services, 2001). The primary classification distinguishes *Overseas* from *US (including territories)*. *US (including territories)* includes those respondents with permanent duty stations located in the 50 states, District of Columbia, Puerto Rico, and United States territories or possessions. Within the *Overseas* classification, two regions can be reported separately: (1) *Europe*, which includes countries such as Bosnia-Herzegovina, Germany, Italy, Serbia, and the United Kingdom; and (2) *Asia and Pacific*, which includes countries such as Australia, Japan, and Korea.
- *Housing location* – Respondents are classified primarily for financial analyses based on whether they are provided housing directly or by allowance, rather than community analyses based on geographic location of the housing. From self-report data, *On Base* includes living in or aboard ship, in barracks/dorm/BEQ/UEPH/BOQ/UOPH<sup>3</sup> military facilities, or in on-base military family housing. *Off Base* includes living in military family housing off base, in privately owned or rented housing, or in privatized military housing. If the self-reported data are missing, then on base and off base are imputed from record data indicating whether the respondent does not or does qualify, respectively, to receive Basic Allowance for Housing (BAH) or Overseas Housing Allowance (OHA).

---

<sup>3</sup> Bachelor/Base Enlisted Quarters, Unaccompanied Enlisted Personnel Housing, Bachelor Officers' Quarters, and Unaccompanied Officers Personnel Housing, respectively.

**Figure 1.**  
***Geographic Locations Used for Analyses***

- *Education* – Respondents are classified based on self-reported educational attainment. *No College* includes anyone without some college credit. *Some College* includes those with some college credit, including a 2-year degree, but does not include those with a 4-year degree. *Four-year Degree* includes those with a 4-year degree and those with some graduate school, but no graduate or professional degree. *Graduate/Professional Degree* includes those with masters, doctorates, and first professional degrees (i.e., MA/MS/MEng/MBA/MSW/PhD/MD/JD/DVM).
- *Family status* – Respondents are classified based on self-reported marital status, spouse employment, and legally dependent children (ages 22 and under). Except for *Working Spouse*, missing data can be imputed from record data if the respondents do not answer these questions.<sup>4</sup> *Single* includes those who have never been married or are divorced/widowed and have not remarried. *Married* includes those who are married or legally separated. *With Child(ren)* includes

<sup>4</sup> Because there are no administrative record data for working spouses, this category cannot be imputed.

those with dependent child(ren) aged 22 and under, regardless of where the child(ren) live(s).

- *Working Spouse* includes those members whose spouse is working as measured by the U.S. Census Bureau's Current Population Survey (CPS) questions, including those in military service. *Dual Service Spouse* includes military members married to (including separated from) another military member (active or Reserve components).

### **Survey Methodology**

The survey administration process began on March 10, 2003, with the mailout of notification letters to sample members. This notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. The survey field was closed on April 21, 2003.

Single stage, nonproportional stratified random sampling<sup>5</sup> procedures were employed to ensure adequate sample sizes for the reporting categories. The sample consisted of 34,929 individuals drawn from the sample frame constructed from DMDC's August 2002 Active-Duty Master Edit File. Members of the sample became ineligible if they indicated in the survey or by other contact (such as telephone calls or e-mails to the data collection contractor) that they were not in active-duty service as of the first day of the Web survey, March 10, 2003 (.30% of sample).

Completed surveys (defined as at least 50% of the questions answered) were received from 10,828 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 35%. Data were weighted to reflect the population of interest. These weights reflect (1) the probability of selection, (2) a nonresponse adjustment factor to minimize bias arising from differential response rates among demographic subgroups, and (3) a poststratification factor to force the response-adjusted weights to sum to the counts of the target population as of the month the sample was drawn and to provide additional nonresponse adjustments.

Table 1 shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of members and the portion of total members in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled as well as differences in response rates.

---

<sup>5</sup> In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Service (all male Army personnel in one group, all female Navy personnel in another, etc.). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough respondents from small groups to analyze. Weights are generated so that estimates from the survey represent the population.

### **Tabulation Procedures**

Tabulations for each question from the survey are shown on a set of facing pages. The text of the question and response options are shown at the top of the even-numbered page, with only the question repeated on the odd-numbered page. To compress the width of columns in the tables, the response options are shown with a number or with DNA (i.e., *Does not apply*) and then that number or DNA is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding.

Where an item lends itself to presentation as an average, that average is also shown as a number estimate and in a histogram. The averages lend themselves to a quick scan for reporting groups that differ from other similarly defined groups. Where a true response continuum is available (e.g., number of children or years of service), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response like yes/no, only one percentage is presented. In this case, the histogram represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it is reflecting item nonresponse, and the table notes that "Percent responding are Service members who answered the question."

Not all questions will apply to every respondent. Where possible, the Web survey is programmed to skip questions that do not apply to the respondent. For example, Q10 (How many months has it been since your last PCS?) does not apply to those who have not had a PCS. The notation for this question indicates that the "Percent responding are Service members who answered the question and who had at least one PCS move (Q9)."

The survey does not always skip questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically included in the percentages in the *Percent Responding* column. For example, Q32 asked members to indicate how many years they had been in a relationship with their current significant other. Survey participants can indicate that the question does not apply. Q32 is also an example of where particular care has to be taken to interpret responses because Q32 was (1) within a skip pattern and (2) had an individual item response of *Does not apply*.

### **Combining Information From Multiple Items**

Tabulations in this volume generally present data for individual survey questions. There are two types of exceptions. The first type of exception is where the

results for multiple items are presented on a single set of pages for number of dependents, experiences of financial difficulties, and race/ethnicity.

- In Q39, members are asked how many dependents they have in each of three age ranges. For this question, the tabulations show the percentage of the reporting category with children in that age range. The averages shown on these pages are based only on those with at least one dependent and, therefore, show the average number of dependents for those who have dependents.
- In Q44, members are asked if they had experienced, in the past 12 months, seven indicators of financial difficulty. For each of the seven indicators, the tabulation pages for Q44 show the percentage of the reporting category that said they had experienced that indicator. The summary statistics shown on these pages are the percentages of the reporting categories that experienced at least one of the indicators.
- Race and ethnicity questions (Q118 and Q119) are reported in a single set of tabulations. The tabulations show the percentage that responded that they were Hispanic (Q118). If Hispanic was not specified, then the tabulations show the percentages that responded White, Black, American Indian/Alaska Native, Asian, or Native Hawaiian/Other Pacific Islander, or as more than one race (Q119). Respondents that indicated more than one race are tabulated only in the percentage of "More than one race marked."

The second type of exception pertains to constructed scales for perceived stress and spouse employment.

- The SOFS Web surveys will report multiple-item measures that are found to be useful indicators for military and civilian personnel management. The Perceived Stress Scale, measured by Q81a-Q81j, is one such indicator used in this survey. For additional information on the Perceived Stress Scale, please see Cohen (1983). In the tabulations, individual items in this scale are presented first; following the items is an additional set of tabulation pages showing the indicator computed from the combined scale items.
- Spouse employment indicators are derived from Q113-Q117 and are modeled on the items used to measure unemployment rates in the U.S. Census Bureau's Decennial Census and Current Population Survey (CPS). Two sets of tabulations are presented. In the first set, labor force participation is shown for the spouses of those in the reporting category. Percentages are shown in four categories: (civilian) employed, unemployed, not in the labor market, and Armed Forces member. Those not in the labor market include those who are permanently or temporarily not working or actively looking for work.<sup>6</sup> The second set of the data

---

<sup>6</sup> Those who have not actively looked for work in the past 4 weeks are considered to be out of the labor market. This category includes some percentage of spouses who are in the midst of a PCS move and, therefore, only temporarily out of the labor market.

shows only those in the labor market. That is, the percent responding are married Service members who answered the items and whose spouses are in the labor market (civilian employed, unemployed, and in the Armed Forces). The unemployment rates shown in these tables are the percent of those who need or want to work and are unemployed. These rates are comparable to those reported monthly by the Bureau of Labor Statistics based on the CPS data.

### **Margins of Error**

The complex sample design required weighting to produce population estimates such as percentages.<sup>7</sup> This also means that the typical rules of thumb for interpreting how good an estimate is, such as the number of respondents, will overstate the reliability of the estimate. For this report, variance estimates were calculated using SAS<sup>®</sup> PROC SURVEYMEANS.

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters such as a percentages or means and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for the percentages in the row is shown. That is, the margin of error is calculated for each response option percentage and the largest of these is printed. For each average shown in these tabulations, its margin of error is printed.

Estimates may be unstable based on a small number of observations or relatively large variance in the data or weights. Particularly unstable estimates are suppressed or annotated in these tabulations. The following rules are used:

° indicates that no one in any reporting group selected the response option,

NR indicates the estimate is Not Reportable because it was based on fewer than 30 respondents or the relative standard error was high,

NA indicates the response option was Not Applicable for the reporting category because it was not selected by any respondent in that category,

no Max ME is printed when all percentages in the row are shown as “NR,”

no margin of error is printed for an average when it is shown as “NR.”

## PRIVACY ACT STATEMENT FOR STATUS OF FORCES SURVEYS

In accordance with the Privacy Act, this notice informs you of the purpose of the Status of Forces Surveys and how the findings of these surveys will be used. Please read it carefully.

**AUTHORITY:** 10 United States Code, Sections 136, 1782, and 2358.

**PRINCIPAL PURPOSE:** Information collected in this survey will be used to report attitudes and perceptions about personnel programs and policies. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individuals.

**ROUTINE USES:** None.

**DISCLOSURE:** Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by persons engaged in, and for purposes of, the survey research.

## SECURITY PROTECTION ADVISORY

**WEB SITE PRIVACY:** The Department of Defense and Data Recognition Corporation will collect no personal information about you when you visit this Web site unless you choose to provide it yourself. If you supply us with personal information, it will be treated as confidential.

In addition, our system does not enable "cookies," which are files placed on your computer's hard drive in order to monitor your use of the site or the Web. For more information about your privacy rights, please read the Privacy Act Notice at the start of the survey.

This Web site does gather and store certain data from your visit. This non-personal information makes the site helpful to you by recognizing the types of technology you use. The data collected appear below:

Your Internet host or domain (for example, "youragency.mil" if you connect from a military domain; "yourschool.edu" if you connect from a university's domain; or "yourcompany.com" if you use a private Internet access account).

Other examples of domains are compuserve.com and aol.com.

Your Internet Protocol (IP) address (for example, www.compuserve.com, www.aol.com, 122.3.55.34). Depending on your Internet service provider, IP addresses may identify your computer; in other cases, they identify no more than your Internet service provider (such as AOL or Earthlink). This is stored for troubleshooting technical problems.

The type and version of the browser and operating system you use to access our site.

The date and time you access this site.

## ABOUT THIS QUESTIONNAIRE

### What is the Status of Forces Survey (SOFS) Program?

- SOFS is a Department of Defense (DoD) personnel survey program that features short, Web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness.
- These surveys enable the DoD on a regular basis to quickly and accurately gauge the attitudes and opinions of the entire DoD community – active duty or Reserve component members and spouses, and DoD civilian employees – on the full range of personnel issues.

### Why should I participate?

- This is your chance to be heard on issues that directly affect you.
- Some examples of topics include: quality of life, retention, retirement, and satisfaction.

- Your answers on a survey make a difference. For example, results from previous surveys have played an important role in deliberations on pay rate adjustments, cost of living and housing allowances, and morale and retention programs.

#### **How do I participate?**

- To participate, you are asked to (1) read the Privacy Act Statement if you choose, (2) verify contact information, and (3) provide us e-mail address(es) so we can notify you when the survey is ready. We would appreciate your doing this step now. To participate now, click the Continue Now button.

#### **How did you pick me?**

- We use well-established, scientific procedures to select a sample that represents the Defense community.
- This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., Service, rank, etc.).
- You were selected at random from one of these clusters of people.

#### **Why am I being asked to use the Web?**

- Web administration enables us to get survey results to senior Defense leaders faster.

#### **Why are you using a .net instead of a .mil domain to field your survey?**

- When the SOFS program was established, a .net domain was chosen for three reasons.
  1. The SOFS operations contractor, Data Recognition Corp., consolidates both Web and paper survey data for DoD and it is more efficient for the Government to collect it at their single site.
  2. This makes it as easy as possible for everyone to access the survey, even from a non-government computer.

#### **Do I have to take the survey in one sitting?**

- No, it is not necessary to complete the survey in one sitting. Just click the "Save and Return Later" button and the work you completed will be saved.
- When you return to the survey, merely enter your Ticket Number again. Entering your Ticket Number will bring you to the place in the survey where you had stopped.

#### **Why does the survey ask personal questions?**

- The Defense Manpower Data Center (DMDC) traditionally reports not only overall results, but also results by race/ethnicity, paygrade, etc.
- To complete these analyses, we must ask respondents for this type of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel (e.g., enlisted/officer, males/females) so that no groups are overlooked.
- Sensitive questions are sometimes also asked about topics like personal finances. Such information will be used to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

#### **Will my answers be kept private?**

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579).
- Only group statistics will be reported. Individual data will not be reported.

#### **Will I ever see the results of the survey?**

- This survey's briefings and reports will be posted on the following Website:  
<http://www.dmdc.osd.mil/surveys/>
- When you complete a survey, you can request to be notified by e-mail when results are posted on the Web.

#### **What is DMDC?**

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. It also conducts Joint-Service surveys and operates the Status of Forces Survey Program for the DoD. To learn more, visit the DMDC web site:  
<http://www.dmdc.osd.mil/>

#### **How do I know this is an official, approved DoD survey?**

- In accordance with DoD Directive 8910.1, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for the SOFS is DD-P&R(AR)2145, expiring 05/23/05.

**What is ADSurvey@osd.pentagon.mil?**

- The official e-mail address for communicating with active duty members about Status of Forces Surveys. The name is short for Active-Duty Survey.

**How to Contact Us**

- If you have questions or concerns about this survey, you have three ways to contact the Survey Operations Center:
- Call 1-800-881-5307  
Or
- E-mail us using the following link: [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil)

**Appendix C.**  
**Status of Forces Surveys of Active-Duty**  
**Members Long-Term Content Plan**

The long-term content plan outlines a six-survey, 2-year cycle of content coverage. In addition to this coverage, there are a series of measures that are included on all surveys. These include outcome measures [i.e., overall satisfaction, retention intention, perceived readiness, and stress that also are potential “leading indicators” and moderators (e.g., tempo and PCS moves)]. There is also space on all surveys for additional items of interest at the time of administration.
