The Department's environmental budget includes resources in the Environmental Restoration, Defense (ER,D) appropriation; the Services' and Defense Agencies' Operation and Maintenance, RDT&E, Procurement, and Military Construction appropriations; and the Base Realignment and Closure accounts. ER,D funds are used for cleanup resulting from past hazardous waste disposal activities. Compliance resources are required for environmental cleanup activities that result from ongoing operations, e.g., the cleanup of fuel contamination at an active motor pool. Conservation investments reflect DoD's look to the future to protect our natural and cultural resources. Pollution Prevention funds activities designed to reduce pollution at the source. Investment in environmental technology supports each of the environmental programs by matching technology developments to environmental needs and by targeting R&D to high payback areas. The Base Realignment and Closure accounts finance both environmental restoration and compliance programs for bases to be closed. Each of these program areas is addressed below.

Environmental Restoration

The Environmental Restoration, Defense (ER,D) appropriation provides for the identification, investigation, and cleanup of past contamination from hazardous substances and wastes; correction of other environmental damage, detection of unexploded ordnances; and demolition and removal of unsafe buildings, structures, and debris.

In FY 1984 the Congress established the ER,D appropriation in order to provide increased emphasis and visibility of expanded environmental restoration efforts on both active installations and formerly-used lands. In FY 1986 the Congress provided the Department with the authority to transfer funds from the central ER,D appropriation to the various Defense appropriations to finance environmental restoration efforts. In FY 1994 the Congress

637

ENVIRONMENTAL PROGRAMS

appropriated to the ER,D account \$1,962.3 million. This amount was increased by \$2.7 million from prior year recoveries for a total FY 1994 funding level of \$1,965.0 million.

The FY 1995 budget request increases the funding for environmental restoration to \$2,180.2 million, an increase of \$215.2 million over the FY 1994 amount. This increase is necessary to cover the estimate for legally mandated requirements.

The following chart identifies actual FY 1993 transfers from the ER,D account to the applicable Defense appropriations, the planned FY 1994 transfers, and the funding budgeted for transfer in FY 1995. (The FY 1995 budget request reflects the FY 1994 and FY 1995 amounts in the ER,D account rather than in the Component estimates.)

ENVIRONMENTAL PROGRAMS

Environmental Compliance

The FY 1995 compliance program, funded in the Component appropriations, includes sufficient resources to enable the Department to comply with increasing requirements attributed to accelerated state enforcement and the enactment of additional laws regulating environmental effects from day-to-day operations by state and local governments. The table below displays amounts budgeted by DoD Component for environmental compliance.

	Environmental Compliance (\$ in Millions)		
	<u>FY 1993</u>	<u>FY 1994</u>	<u>FY 1995</u>

ENVIRONMENTAL PROGRAMS

Environmental Conservation

The Department of Defense is the steward for over 25 million acres of public lands. The conservation program ensures that the biological, cultural, and historical resources on these lands are managed in balance with the military mission. The table below displays amounts budgeted by DoD Component for the environmental conservation program.

	Environmental Conservation (\$ in Millions)		
	<u>FY 1993</u>	<u>FY 1994</u>	<u>FY 1995</u>
<u>TOTAL ENVIRONMENTAL CONSERVATION</u>	<u>132.7</u>	<u>129.8</u>	<u>106.1</u>

ENVIRONMENTAL PROGRAMS

Pollution Prevention

The FY 1995 pollution prevention program is designed to reduce or eliminate the impact that DoD operations may have on the environment through the elimination or reduction of waste at the source. In addition, the FY 1995 program supports requirements included in Executive Order 12856, "Federal Compliance with Right-to-Know Laws and Pollution Prevention Requirements", and Executive Order 12873, "Federal Acquisition, Recycling, and Waste Prevention." The table below displays amounts budgeted by DoD Component for environmental pollution prevention.

	Pollution Prevention (\$ in Millions)		
	<u>FY 1993</u>	<u>FY 1994</u>	<u>FY 1995</u>

ENVIRONMENTAL PROGRAMS

Environmental Technology

Technology development is important to meet widespread environmental needs with programs that yield quick results and have high payoffs, including the acceleration of the development and deployment of technologies that address issues, such as environmental restoration, waste minimization, and hazardous waste substitutes. The FY 1995 request allows DoD to continue environmental research, development, test, and evaluation activities to provide long-term benefits in terms of conserving and rehabilitating the environment and protecting human health. The table below displays amounts budgeted by DoD Components for environmental technology. The Defense Agencies' estimate includes investments by the DoD centrally managed Strategic Environmental Research and Development Program and Environmental Security Technology Certification Program.

ENVIRONMENTAL PROGRAMS

Base Realignment and Closure (BRAC)

DoD is making every effort to complete scheduled base closures as rapidly as possible to enable the Department to realize potential savings and to make property available to local communities quicker. However, in order to close these bases, environmental restoration and compliance work must be completed. Environmental funding included for the first, second, and third rounds of approved base realignments and closures (BRAC I, II, and III) is displayed below.

Base Realignment and Closure
